

What's new in 3.1

Catch a beat, reshape it, and record the performance. A companion to the full field guide.

01 Beat repeat

Start with a loaded loop playing in normal track mode. Hold PLAY while you use the repeat controls.

Catch a beat

Hold PLAY + click rocker UP.

Repeats the previous grid-aligned beat. DOWN starts with two beats on an even-beat grid.

Resize it

Keep PLAY held. UP halves; DOWN doubles.

Click again, or hold the rocker to keep stepping. The captured start stays in place.

Move or shape it

VOL- / VOL+ moves the window.

Add FN + F1 / F2 / F3 for start / end / shift.

Cross each stored fader position to pick up. FN + rocker jumps an octave.

Return to the song

Release PLAY.

Your previous chop returns; playback has kept moving underneath.

No grid? UP starts at 1/8 of the loop; DOWN starts at 1/4. Full repeat and print controls: reference sheet 5.

02 Print your moves

Speed moves now print

During a bounce, release PLAY and use the rocker.

Tape copy records speed moves relative to the starting speed. Sampler print bakes the performance for playback at 1x.

Record a repeat

Hold PLAY, catch a repeat, then tap a spare destination TN.

Keep PLAY held to resize. Release PLAY to let the song flow back in while the copy continues. Tap TN again to stop.

Use a held sampler print

PLAY + hold a destination TN.

Keep TN held: PLAY up gives speed; PLAY down gives repeat. Release TN to end the print.

Jump an octave while printing

Hold FN + PLAY + click the rocker.

Down = one octave lower; up = one octave higher, within the tape-speed range.

Choose a spare track. A loaded destination is replaced. The full bounce workflow is on reference sheets 2 and 5.

03 Small changes, too

Echo + reverb together

Layer both effects at once.

Echo feeds reverb, so you can combine distinct repeats with a reverb tail.

Input monitor mute

PLAY + both VOL toggles monitoring.

A downward LED sweep means muted; upward means live. Ordinary recording still captures the input. The old FN + both VOL shortcut is retired.
